Jeremy Chambers | Software Developer

Email: jeremy@jeremychambers.com | Portfolio: jeremychambers.dev | LinkedIn: llinkedin.com/in/chambersjeremy

Professional Summary

Highly skilled full-stack software engineer with 15+ years of experience in e-commerce web application development. Currently engaged as the team lead developer for a multi-billion-dollar annual sales b2b e-commerce platform. Expertise includes .NET, C#, API, MVC, JavaScript, Vue, Angular, SQL/NoSQL, UI/UX design, Sitecore, cloud-based observability platforms, and analytics. Proven ability to architect, develop, and maintain scalable, enterprise-level applications.Proven team leadership in agile, Kanban, and waterfall methodologies, driving performance optimization and user experience enhancements, and seeking to contribute extensive experience to innovative projects in dynamic organizations.

Back-End Development

- Expert .NET development in C# for robust, scalable applications
- Experienced in .NET, Core, Framework, ASP.NET, MV
- Extensive web development experience, leveraging the MVC pattern and Web Forms framework
- Complex Sitecore implementations, utilizing the Helix architecture for maintainability and scalability
- Developed secure APIs with Web API, GraphQL, and FastEndpoints for seamless integration
- Experience with ORM frameworks such as Dapper, Entity Framework, and ADO.NET
- Creator of Windows Services for efficient data processing and system integrations
- Proficient in unit and integration testing using XUnit, MSTest, Moq, and NSubstitute to ensure code quality
- Conducted performance testing with BenchmarkDotNet, resolving bottlenecks and boosting performance
- Integration experience with SharePoint, Gigya, SAP, DB2, PHI/PPI sensitive data, and streaming video

Front-End Development

- Solid understanding of UI/UX principles, a keen eye for design, color theory, and layout
- Designed user interfaces for diverse industries and audiences, focusing on accessibility and usability
- Expert in core web client technologies including JavaScript, HTML 5, CSS 3, and SCSS
- Proficient in modern front-end frameworks such as Vue, AngularJS, jQuery, and Knockout
- Utilized build tools like Node.js, Webpack, and Gulp to create and manage optimized client-side assets
- Skilled in UI design and graphic creation using tools including Photoshop, Illustrator, and Figma
- Implemented comprehensive testing using Selenium, JMeter, and Postman to ensure cross-browser compatibility and performance

Data Engineering

- Expert-level SQL knowledge, including advanced table design, complex query optimization, efficient stored procedure creation, and performance tuning of execution plans.
- Extensive integration experience with NoSQL solutions, including SOLR and Elastic for full-text search
- Proficient in SQL Server Jobs for robust data pipelines and automation
- Designed database schemas for high-performance applications, ensuring data integrity and scalability
- Implemented migration and ETL processes using SSIS packages, streamlining data workflows

DevOps
- Implemented CI/CD pipelines within Azure DevOps, automating build, test, and deployment processes
- Developed and maintained Graphana and New Relic dashboards utilizing custom queries to provide in-depth performance monitoring and visualization
- Experienced with Git and Gitflow for version control, branching strategies, and development workflows

Professional Abilities
- Strategic Problem Solver, adept at identifying complex issues, developing creative solutions, and implementing effective strategies
- Exceptional Communicator, clear and concise written and verbal communicator, with excellent presentation skills, active listening, and meticulous note-taking abilities
- Experienced team leader and mentor skilled in providing constructive feedback and code reviews, guiding less experienced team members throughout the software development process, including design, code reviews, and promoting coding best practices
- Proficient in collaboration tools such as Jira, Confluence, Slack, and Microsoft Teams to facilitate communication and knowledge sharing in the SDLC

Work History *
* Detailed work history available upon request

2013 - Current | Cencora / MWI Animal Health
Senior Developer IV | Web Team Lead | Boise, ID / Remote

2013 - 2013 | Management Solutions
.NET Sharepoint Developer | Oak Ridge National Laboratory | Knoxville, TN / Remote

2010 - 2013 | Mountain States Health Alliance
Programmer Analyst II | Johnson City, TN

Education / Certifications
East Tennessee State University
Bachelor of Science | Engineering Design Graphics | Johnson City, TN

Microsoft Certifications
Azure Fundamentals
HTML 5, JavaScript, CSS Specialist

PeopleCert
Foundation Cert IT Service Management
